Announcing Vintners Advantage Wine Club Software Modular Information Systems Acquires Rights to Just My Wine Wine Club Software While Also Acquiring Existing Customer Support Base

For Immediate Release--SAN RAMON, CA – February 3, 2009

Modular Information Systems, www.modularinfosystems.com, with an established track record in innovation and Winery Management Software, will take over support for all Just My Wine "Wine Club" software customers. Modular Information Systems will also immediately begin offering the software directly under the Vintners Advantage software brand as an integrated Wine Club module.

The recent agreement is part of Modular's aggressive business strategy offering excellent software solutions to the Wine and Spirits Industry under its well-known and established Vintners Advantage brand. Just My Wine is an innovative Wine Club Management solution that provides comprehensive functionality not found in other wine club management systems. Standard features include operational, product and customer management functions that work together to provide a cohesive Wine Club software package.

The newly branded **Vintners Advantage Wine Club** software is designed to offer a complete and up-to-date database of all wine club member data. The wine club order feature enables wineries to create and efficiently manage wine club shipments that can be readily tracked. Wine Club comes with automatic credit card processing and a built in UPS/FedEx shipping interface. Automatic interfaces to all Microsoft Windows products allow the user to communicate with their customers using regular mail or via email correspondence to notify of upcoming events, product releases and credit card expirations.

The **Vintners Advantage Wine Club** software will be tightly integrated into the Vintners Advantage Tasting Room and Case Good Sales & Distribution software modules, allowing for Tasting Room recognition of Wine Club customers, consolidated purchase histories and real time inventory updates.

Existing Just My Wine Wine Club customers will enjoy the benefit of Modular Information Systems' support resource center, with access to help desk technicians from the internet, email, phone or fax.

For the past twenty-three years, the Modular Information Systems has built its reputation on reliability and integrity. The company's flagship software product, VINTNERS ADVANTAGE, has been a significant player in servicing the needs of international winemakers from Cellar Operations through Point of Sale.

The integrated software and database support platform has thousands of committed users—from “grape to glass.”

Jeff Jakus, a seasoned technology professional and founder of Just My Wine, will remain focused on future product sales efforts and will be directly involved with driving the software’s roadmap--working to evolve our wine club technology to the next level. Release 3 is in development now, and is loaded with many new features requested from the field including login security enhancements.

Customers will benefit from the combined resources and many years of winery-specific experience that this agreement brings to the table. Modular Information Systems has grown their winery relationships to include thousands of users stretched across the country. The company’s Help Desk Services are available to customers 24/7 with both online and localized call support from Modular staff technicians.

“We continue to look at ways to empower our winery customers by enabling them to grow their sales and expand their business. We have a solid and dedicated customer-base who relies on our expertise and support. **Vintners Advantage Wine Club** software is a service-based software module that is also a sales generation tool for our customers. It’s easy to use and implement. It’s a wonderful addition to our product offering,” comments Lisa Levsen, President, Modular Information Systems.
